

FIT AND FORGET WITH ENERGY EFFICIENT HEATSAVR

While precise statistics are still being evaluated, the Bramcote Leisure Centre in the East Midlands is already reaping the rewards of a 30% drop in humidity following the installation of a Heatsavr liquid pool blanket on its pool.

Heating has been drastically reduced and the use of ventilation fans cut by half during opening hours and 70% overnight while condensation is now a problem of the past.

“The quality of the air in the pool hall has improved dramatically since Heatsavr was installed,” confirms Matt Seely, on behalf of Broxtowe Borough Council’s housing, leisure and culture directorate.

Broxtowe invested in the Heatsavr partly due to the design of our main pool, because it has a fixed boom separating it when one part of the pool is in use but not the other, which meant they were unable to cover it and thus was losing a lot of heat and water evaporation.

Facing a big quote for replacement of replacement traditional main pool cover and teaching pool cover – they also took into account the manual handling of putting on and removing the old conventional

pool covers by the staff.

Matt adds: “I would recommend Heatsavr to someone who is unsure about having it on their pool system without hesitation, I have found it to be a true ‘Fit and Forget’ product with easy installation and maintenance free usage, apart from re ordering chemical yearly and topping up the day tank every month.”
