

USER QUOTES

What a few of our customers have to say about Heatsavr...

"Heatsavr has proved a godsend of late when we had boiler problems, it retained a considerable amount of heat overnight that would otherwise have been lost causing us bigger problems"

Midlands City Council Pool

"I would recommend Heatsavr to anyone, we confirm after two years our gas has gone down"

Scottish City Council Pool

"Since the installation we are using less water, an average of 1000 m³ per year"

Welsh City Council Pool

"... very sceptical... but its absolutely brilliant..."

Commercial Pool in Wales

"... it made a big difference... a significant reduction in our gas usage"

Council Baths

"... difficult to quantify in energy terms... it has however helped with condensation... we will be installing Heatsavr in our 5th leisure centre shortly..."

Yorkshire Leisure Centre

"... it definitely works... does exactly what it says... [and] it helped us offset our 85% and 50% increases in gas and electricity costs..."

Tennis & Leisure Centre

"... it has helped with condensation... [and is] currently under evaluation by utilities provider..."

Baths & Leisure Centre

"... one of the main products that has contributed to energy savings... [and] it has enabled us to offset last year's energy increases..."

Midlands Leisure Centre

"... we were initially very sceptical to the product... but we have saved a 1/3rd on our gas and electricity costs... and the pool climate has improved greatly..."

Scottish Council Swimming Pool

"... difficult to quantify in energy terms... but pool condensation has been reduced markedly..."

Girls School

"... our sceptical pool manager is now changing her mind, as the outdoor pool isn't losing the 2/3°C over night that it normally does..."

French Holiday Parks

"Just letting you know that I will be placing an order for 2 months worth of supply... since last Wednesday we have managed to save £286 on our gas bill, so, seems to be going well..."

Commercial Leisure Centre

"We reduced the temperature of the air in our pool hall from 29°C to 20°C every night until 6am when we return it to 29°C. I have not calculated the saving but it must be substantive, there appears to be no evaporation and there are certainly no signs of condensation on the walls or windows"

Gym and Leisure Centre

"We have used Heatsavr for over five years, there is less heat escaping which means no moisture on windows and at only £1.29 per day the energy saving along with reduction in mould growth from condensation and also playing a part in the environmental policy which we hold GOLD award means Heatsavr is a no brainer"

Country Hotel

"Heatsavr will have been saving us money as we were able to reset air handling and extraction to 30Hz, so with less fresh air required there was less heating required which we were able to monitor on our BMS"

University Sports Centre
